

ANGLE2

seamless

Your flexible design team

reliable

**YOUR REMOTE
DESIGN TEAM**

Your remote design team

You are excellent developers and create amazing applications.

We provide you with high quality design expertise, frictionless collaboration, and on-time delivery.

Always. Your perfect design partner.

OUR KEY VALUES

Quality

We work in a pixel-perfect format using most modern design trends and practices.

Keeping promises

We always fit into budgets and timelines. Because we do not promise anything we can't do.

Easy communications

Easy communications. We are always in touch. And we ask many questions :)

WHO WE ARE

Angle2 is a friendly team of UI/UX designers and front-end developers. We enjoy to create modern, intuitive and easy-to-use web and mobile interfaces.

We appreciate smooth processes and good communications

WHAT WE DO

UX research and prototyping

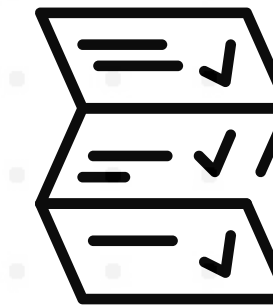

UI design of web and mobile apps,
web portals and landing pages

Front-end development:
Vue.js, Nuxt.js, React.js,
HTML/CSS animation

WE UX CREATE

Gathering requirements with or instead you. Making sure that the business goals will be reached

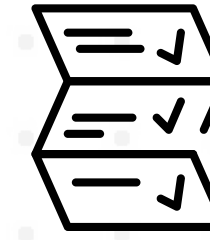

Preparing documentation

Early testing [with users] of the app by prototyping it

WE UX CREATE

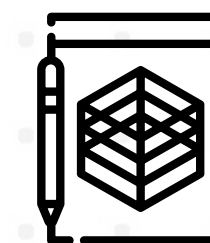

Research:

- Stakeholders interviewing
- Users interviewing
- User testing
- Statistic analysis
- Usability evaluation
- Competitor analysis

Documentation:

- Personas
- User/job stories
- Journey maps
- Use cases
- User-flow
- Information Architecture

Prototyping:

- Wireframes
- Clickable prototypes
- Testing prototypes with users

USER INTERFACE DESIGN

The primary goal of a good design is to give users an intuitive and easy to use tool.

We control users' attention and direct it in the best way. Combining the best design techniques we create a new design language for your product, pack it into a pixel-perfect UI kit and spread through all your screens.

Our favorite tools are Sketch and Invision.

All assets are transferred to Zeplin for further front-end development.

FRONT-END DEVELOP- MENT

For bringing a pixel-perfect design we prefer converting our mockups into the HTML/CSS code by ourselves. So that we can guarantee really perfect quality.

Or we'll be happy to work with your developers and help them to implement our design. And provide you with a detailed feedback/bug reports till layouts are perfect.

**START
A PROJECT**

We're ready for onboarding your
or your client's project right away!
